Projects

Isoba Education   Feb 2023 – Jun 2023

This project is based on CRM, and I have worked on three modules: Staff Work Report, Suggestions, and Events. The Staff Work Report module involves updating the weekly and monthly work status, such as student attendance and staff call status. The Events module handles calendar functions, including arranging the location, date, and time through form submissions.

Pranavam Jun 2023 –Sep 2023

This Project is another CRM project,and I have worked on individual Project,specifically creating the admin panel.Some of the modules I have worked on include Student Batch,Course Attendence,Product and finance.The main Focus of this project is on Student Admission and managing pending fees, where students will receive messages regarding their dues.Additionally,the project involves selecting the course batch for Students.

Kerala Wings Aug 2023 – Sep 2023

Developed a comprehensive taxi driver leave, Terms and Condition Customer Create enabling drivers to efficiently manage their schedules, request leaves, and access detailed trip assignments and more additional features.
